Career Objective

As a highly motivated and skilled in Computer Science, I possess a genuine passion for developing innovative Software solutions. Proficient in various programming languages including C#, PHP and JavaScript with decent experience in developing Web Applications. I have hands-on experience in building dynamic Web Applications, designing relational databases and debugging software. I am trainable, collaborative team player with a proven track record of delivering high-quality work.

Skills and Achievements

- Developed Software using PHP, HTML, CSS, Javascript, C#, .Net Core MVC, .NET Core API, AJAX, JQUERY, SQL, Relational DBMS.
- Developed knowledge, skills, and decent knowledge in programming.
- Hackerrank Bronze Medal

Education& Qualifications

2020 – Present **STI College Ortigas Cainta Campus**

2018 – 2020 **MFI Polytechnic Institute Inc**

Computer Skills:

ECDL: Microsoft Excel, Word, PowerPoint, Access, Visualized Github, Git (Source Control)

Goals and plans for the future

Goals

- Building Projects
- Taking Premium Courses
- Cultivating a Habit of Reading Habit
- Networking

As a computer science student, I am eager to nurture my skills by working on personal projects, taking advanced web development courses and cultivating a habit of reading essential books. This approach not only enhances my technical skills but also bolsters my communication skills which is a vital assets in the competitive world of software engineering. My primary objective is to secure a position in the software engineering field as entry level programmer where I can make my hands dirty by immersing myself in hands-on practice through making impactful projects, collaborating alongside with experienced developers who can provide invaluable guidance which all contributed to my overall growth in the industry.

Plan

• Project

To enhance my skills and bridge any knowledge gaps, I should take the path of comprehensive approach. Firstly, I'll brainstorm and create a list of personal project ideas and impactful books that not only advance my web development abilities but also contribute to improving my communication skills.

• Course

Alongside with this I'll identify web development courses that align with my career aspirations and enroll in them to fuel my learning journey. Additionally,

• Reading

I'm setting aside dedicated time for reading essential books in both software engineering and communication. These books will serve as valuable resources to elevate my skills to the next level.

• Networking Plan

Engaging with online communities is also a crucial step in my plan. I will network with fellow student developers and seasoned professionals and potentially finding mentors and collaborators. This strategy will significantly contribute to my overall progress in the field of web development.

- **Job Search Plan**

Moreover, I'm preparing myself for the job market by crafting a decent resume and optimize my LinkedIn profile is a must, along with this, I will conduct thorough research to various companies of interest and diligently prepare for technical interviews which will give me a valuable insights in the future on what should I focus on in the moment. Lastly, I understand the importance of self-assessment.

- **Self-assessment**

I will regularly review my progress and celebrate little achievements along the way. This approach ensures that I remain adaptable and open to new opportunities throughout my journey.
